

Breeze

Breeze table
Foyer chair

Breeze is a game of geometries, a 360° optical illusion. Two-dimensional shapes that extrude and intersect giving a new visual perception, thanks to their monochromatic surface that changes with light.

Breeze

design by Archirivolto

CS4143

The Breeze table is a game of geometries, a 360° optical illusion. It's inspired by the "ellipses" of the artist Turi Simeti. Two-dimensional shapes that extrude and intersect giving a new visual perception, thanks to their monochromatic surface that changes with light.

It is a fixed table with base in shaped sheet metal with a strong visual impact, available in 2 sizes.

It mounts glass and ceramic tops in different shapes.

The new annealed glass tops give an iridescent effect that recalls the surface of the water moved by the wind.
