AQUACLEAN, THE FABRIC YOU CAN CLEAN WITH JUST WATER

Enjoy **relaxing moments** on your sofa, resting assured that **Aquaclean® Technology** will enable you to remove stains with water alone.

Yes, **Aquaclean** helps you get rid of everyday household stains (*wine, ink, sauce, oil, mud, chocolate, cream, and many more*) in **three simple steps**, fast and easy, saving you cleaning and maintenance time for your sofa fabric, and guaranteeing you can enjoy your sofa moments 100%.

So sit back and **enjoy your sofa** whenever you want. And forget about your worries, thanks to **Aquaclean**.

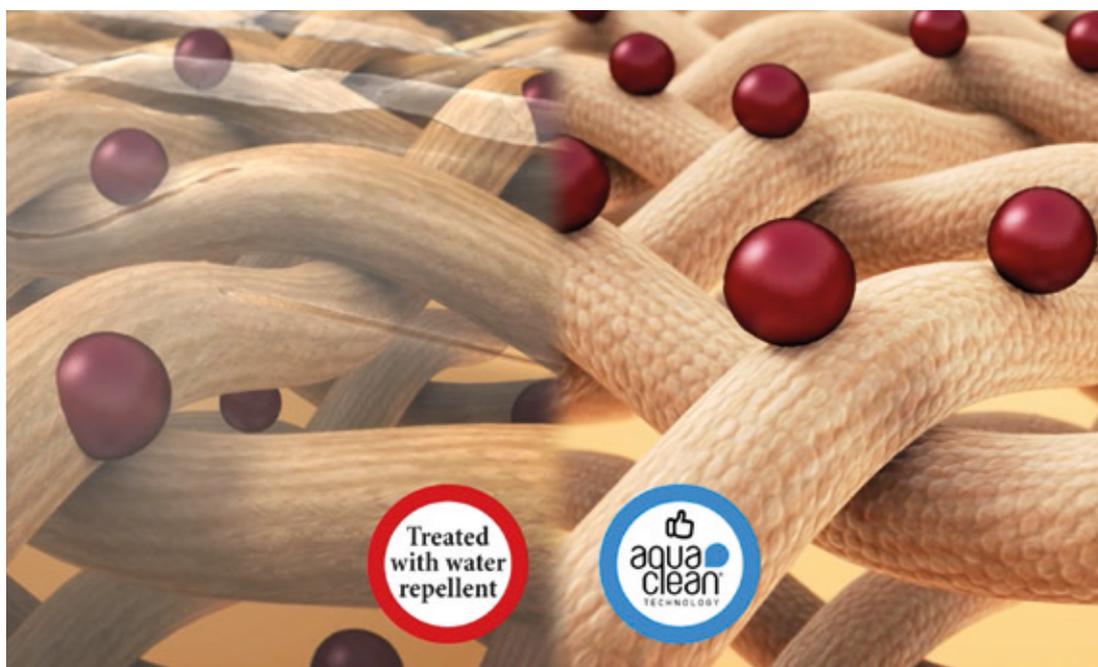

EASY CLEANING: REVOLUTIONARY TECHNOLOGY FOR MORE SOFA ENJOYMENT

Aquaclean presents a revolutionary new anti-stain technology so you can enjoy your sofa whenever you want, with total peace of mind. What we've done is incorporate in all our collections a special treatment that not only repels liquids, but also acts as a cleaning facilitator by making stains more transferrable from fabric to water, which simplifies cleaning and gets stains out faster, even long after staining has occurred.

Aquaclean® Technology is the innovative solution that pampers your sofa fabric and extends its lifespan.

This is why **Aquaclean** is now a benchmark name in the textile trade, having become the brand of choice both in homes and the Contract sector (*hotels, department stores, high-traffic areas, etc.*).

HELLO STAINS! GOODBYE WORRIES!

Jumping around, painting pictures or snacking are now OK things to do on the sofa in homes around the world, thanks to **Aquaclean**. Families in more than 60 countries around the world trust our fabrics. Because they know that using **Aquaclean** means no more worries about stains, ever!

Relax and enjoy your sofa to the max, with complete peace of mind, because whatever the normal everyday stain, you can clean your sofa fabric easily, in three simple steps!

1. Remove any excess residue on the upholstery.
2. Apply water over the stain, either directly or using a damp cloth. Wait a few seconds.
3. Press down on the stain with the damp cloth and rub gently over the fabric in circular movements. If the stain does not come off completely (*especially for stains that have dried*), repeat the process as required.

For normal sofa maintenance we recommend that you vacuum the entire surface area regularly. You can use a normal home vacuum cleaner with a brush fitting.

FABRICS CREATED TO CARE FOR YOU AND THE PLANET

At **Aquaclean** we are committed to caring for our planet. That's why we invest in both human and financial resources to ensure that our fabrics meet the most demanding quality controls on both national and international levels.

MORE ECO-FRIENDLY LESS HAZARDOUS

Our technology guarantees that all resources used in the manufacture of our products are **100% eco-friendly**. All components used in manufacturing have been tested for hazardous substances, and are therefore guaranteed to be **harmless to humans and the environment**.

TESTED TO PROTECT YOUR HEALTH AND THE ENVIRONMENT

Aquaclean does not use any PFCs, as these substances have **possible harmful effects on the environment and human health**. PFCs are artificial substances used in the textile industry for their properties as liquid repellents, which can interfere with the proper functioning of our hormonal system, and can cause birth defects, reproductive problems or damage to our metabolism.

COMMITTED TO THE CONSERVATION OF THE OCEANS

The oceans are vital ecosystems on our planet. This is why we need to guarantee their conservation, through institutions such as the IMO, the International Maritime Organization. This is a specialized United Nations agency responsible for regulating shipping, contributing to safety and protection of navigation, **and the prevention of marine pollution caused by ships**.

BS5852 0-1
UNE EN ISO 1021 1-2

FIRE RETARDANT: HIGHER LEVELS OF IGNITION RESISTANCE

Aquaclean incorporates new **Fire Retardant** technology in all our collections.

This technology prevents or delays ignition, thereby helping to stop fire from spreading across the fabric. That gives you more time to get things under control.

Fire Retardant Technology pursuant to European Installations Regulation, with BS5852 0-1 and UNE EN ISO 1021 1-2 Certification (*cigarettes and matches*), ensuring a high capacity of the fabric to prevent ignitability.

Clean on the outside, clean on the inside.

For your peace of mind, **Aquaclean** fabrics offer a double guarantee of hygiene from the factory to your home:

On the one hand, the Safe Front[®] component protects against viruses and bacteria as standard, effectively reducing its activity. On the other hand, the **Aquaclean** component limits the penetration of viruses and bacteria into the fabric. The joint formula of **AQUACLEAN** and **SAFE FRONT[®]**, has been totally effective after multiple washes and years of use. *(10 washing cycles have been tested at 30°C, demonstrating its effectiveness).*

Safe Front[®] protects as standard against enveloped viruses and bacteria, effectively reducing its activity. This shield maintains optimal levels of hygiene on your sofa by acting permanently. **Safe Front[®]** has been proved to be a great help against mite allergies since 1999.

DOWNLOAD CERTIFICATES: (QR)

Aquaclean / Safe front[®] fabrics are currently certified in the following ISO standards:

- **ISO 20743: 2013 8.1**
for the determination of bacterial activity.
- **ISO 18184: 2019**
for the determination of antiviral activity.

From March 2019, all **AQUACLEAN** collections have incorporated the **SAFE FRONT[®]** treatment

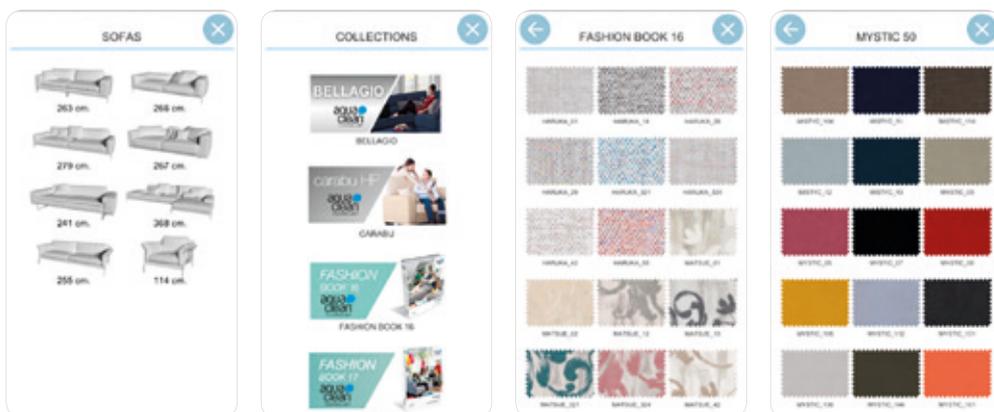

WHAT DO YOU THINK YOUR SOFA WILL LOOK LIKE?

Would you like to see how one of our collections will look in your very own living room? It's easy. With the new Augmented Reality (AR) application. Download it using the QR below, and discover a world of possibilities at your fingertips.

Aquaclean's augmented reality app gives you a 3D immersion experience so you can visualise your new upholstery fabrics in your very own home.
